- HTML
- Cascading Style Sheets (CSS)
- Javascript
- React
- Responsive Design
- UX/UI Design
- Database/API Integration
- Version Control System (Git)
- NodeJS
- Web Development

## Projects

**Video Game Suggester** - <https://videogamesuggester.carlboothsoftware.co.uk/>

This app is a tool used for video game discovery, it suggests a game based on a selected platform from a pool of over 850k+ games. Information is pulled from the RAWG API and it will present the user with information on a particular game including a Metacritic rating, description, some screenshots and a link to purchase if one is available.

HTML, CSS, Javascript, React, GIT, Github, REST API

**QuantumMind AI Solutions** - <https://quantummindaisolutions.carlboothsoftware.co.uk/>

A fully responsive frontend for a software company based on a Figma design.

HTML, CSS, Javascript, React, GIT, Github, Figma

**Hoobank** - <https://hoobank.carlboothsoftware.co.uk/>

A frontend for a bank with the design taken from a Figma specification. I used my frontend skills to create the UI which is fully responsive and works on all device sizes.

HTML, CSS, Javascript, React, GIT, Github, Figma

**Gericht** - <https://gericht.carlboothsoftware.co.uk/>

A landing page built for a restaurant made to look attractive in order to entice potential customers into booking a table. The website is fully responsive.

HTML, CSS, Javascript, React, GIT, Github, Figma
